

Projects!

Ou yeah, let's go with the list:

- [Undertale Prisma!](#). Not a fan of Undertale, but I'm a fan of programming games :=)
- Security inside a kubernetes helm for Ontotext! Check [here](#)
- Random bullshit go! HTB, OverTheWire, you name it! And also with horrible writeup! C'mon, you can find pretty writeups everywhere, but horrible one? only [here](#)!
- A couple of custom CTFs... Because, why not:
